DETAILED ACTION

1. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Group 1640, Technology Center 1600.
2. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.
3. Claims 1-42 are pending in the instant application.
4. Independent claim 11 includes the recitation of "modulation" of immune function that can be either stimulatory or inhibitory. Stimulation and inhibition are mutually exclusive; therefore, the restriction has been set forth for "modulation" that is stimulatory and "modulation" that is inhibitory as separate groups, irrespective of the format of the claims.

Election/Restrictions

5. Restriction to one of the following is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a composition, classified in Class 530, subclass 350.
 - II. Claims 11-24 and 37-42 drawn to a method of modulating an immune response wherein the modulation is inhibitory, classified in Class 424, subclass 184.1.
 - III. Claims 11-24 and 31-36 drawn to a method of modulating an immune response wherein the modulation is stimulatory, classified in 424, subclass 184.1.
 - IV. Claims 25-30, drawn to a method of treating an allergic condition, classified in Class 424, subclass 184.1.

Art Unit: 1644

The inventions are distinct, each from the other because of the following reasons:

Groups I and II-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05 (h)).

In the instant case, the product as claimed can be used as an immunogen to produce antibody, screening assays, as well as the therapeutic methods as claimed. Therefore, they are patently distinct.

Groups II-IV are methods of treating different diseases that differ with respect to etiology and require different ingredients and process steps to accomplish different endpoints since stimulation and inhibition are mutually exclusive. Therefore, they are patentably distinct.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
